

Thermoflow's Gas Turbine, Combined Cycle and Cogeneration System TRAINING

CUSTOMIZED SEMINAR

The 5-day Seminar is intended to teach the fundamentals of software modelling of Gas Turbine and Gas Turbine Combined Cycle systems with Thermoflow Software.

The Seminar is either based on carefully selected samples, or real world projects (customized) provided by the client.

The Seminar includes an introduction of Thermoflow's design and simulation programs GT PRO and THERMOFLEX.

Course Rate: US\$ 49,000

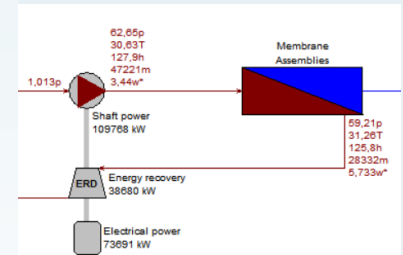

Max. number of attendees: 15

Location: Frankfurt / Germany

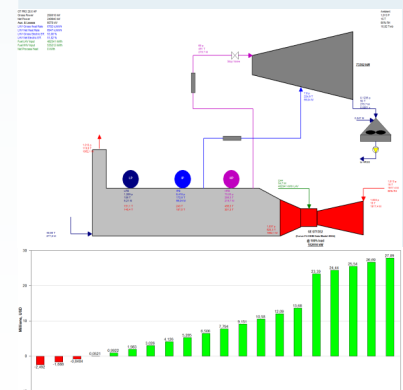

Date: 26-30 August 2024

Software for all training attendees for the duration of the training is included.
